### Disregard The "Vindication" Plea

I the other

What has Holm O. Bursum ever done that he should be hou oved with the high office of governor at the imads of the people of New Mexico?

Barson is company for office on the "vindication" plea. He hope, to be elected and in that way publish to the whole country the fact that the people of this great state regulate the high hunded methods that have characterized his political career in

Borsons alcoholy dominated the New Mexico legislature for years and a sorr; mess he made of matters. He has ruled with an iron hard in Sweers, his home country and conditions could not possibly be any worse than they are there. How the edu-cational system of the state would fare order his administration as governor was exemplified in his own county a few years ago when he was instrumental in having the solary of the county so perintendent reduced to \$400,00 a year simply because the super intendent happened to be a Democrat. This shows how highly Bursain regarded que educational system at that time and there to be reason to believe that he would not practice the same methods il elected governor. He bungled matters in connection with the wardonship of the penitentiary and we have an reason to believe that he would not conduct the office at governor in the same deposited manner. Bursum has in many ways demonstrated his milituous for public office and the voters of New Mexico should are that he is overwhelmingly defeated on November T.

Frank Hubbell is another man who is so-king "vindication." He hopes the voters of the state will soud hou to the United States sensite and thus publicly proclaim the fact that his political past or Bernalilla county has been fargesten. Kreked out of office by secretion of his own party after the tallest investigation had been given his official acts, he now seeks vindication by asking he veloce to send him to the senate. Frank Hubbell has been no notures in the post, so far as his political life is concerned, that is about any he homored with any office at the hands of the voters of Non-Hexago

Nominating Unidell and Bursum snows that the Republican party to New Mexico has not relarged. It is controlled by the some and gauge that practiced the well-known highbinder methods in the state for years. The political resords of these men are so colonia that the party mountains them he public offices ought to happen a week from Tuesday. The profile of New Mexico are discidually access of the old growd. They got by with their rough stuff for years, but it new day has daymed. Right will triningh at the polls. Derent for limitally Bursons and the balance of the Regulations state tirket is contain.
